PROFESSIONAL SUMMARY

BCA (Cloud Computing & Security) student, graduating 2027, seeking entry-level roles such as Cloud Support Associate, Technical Support Engineer, Associate Engineer, Graduate Trainee, or Junior Cloud/DevOps. Built two AWS projects using Terraform and Docker: a secure multi-AZ 3-tier application and a high-availability setup with auto-recovery, tested against 3 failure scenarios. Resolved 15+ AWS networking, IAM, KMS, and deployment issues. Completed a 135-hour TCS iON cloud project and the Udemy AWS Solutions Architect Associate course (2026).

TECHNICAL SKILLS

AWS: EC2, VPC, S3, RDS, IAM, ALB, Auto Scaling, Route 53, Cloud Formation, Dynamodb, CloudWatch, CloudTrail, SSM, KMS, Lambda, SNS, Secrets Manager

Cloud Security: IAM Least Privilege, Security Groups, NACLs, KMS Encryption, VPC Flow Logs, Network Segmentation, CloudTrail Auditing

DevOps Tools: Terraform, Docker, Git, GitHub Actions, CI/CD, Jenkins, Kubernetes (Fundamentals)

Systems & Networking: Linux, Bash, TCP/IP, DNS, CIDR, Routing, NAT, Load Balancing, Monitoring, Alerting, Health Checks, Troubleshooting, AD

Programming & Database: Python, Boto3, PowerShell, SQL

Architecture Concepts: AWS Well-Architected Framework, Multi-AZ, High Availability, Fault Tolerance, Scalability, Infrastructure as Code (IaC), 3-Tier Architecture

Professional: Troubleshooting, Root Cause Analysis, Incident Response Basics, Technical Documentation

PROJECTS

Secure Multi-AZ AWS Infrastructure & Application Deployment [Live Demo](#)

- Built a multi-AZ, 3-tier AWS environment using 10 AWS services (VPC, ALB, Auto Scaling, EC2, RDS, IAM, SSM, KMS, Secrets Manager, CloudTrail) with Terraform, hosting Dockerized apps and a private RDS PostgreSQL database.
- Secured access and data with IAM least privilege, SSM Session Manager (no open SSH), KMS encryption, Secrets Manager, and CloudTrail auditing.
- Segmented the network across 3 tiers to keep the database private and reduce the attack surface.
- Resolved 15+ networking, IAM, KMS, container, and deployment issues and documented root causes.

AWS Reliability & Auto-Recovery Project [GitHub](#)

- Built a highly available architecture with Terraform using VPC, ALB, Auto Scaling EC2, and RDS to remove single points of failure.
- Configured ALB health checks and Auto Scaling to automatically replace unhealthy instances.
- Set up CloudWatch alarms and SNS notifications for CPU and health thresholds.
- Tested 3 failure scenarios (EC2 termination, high CPU, unhealthy target) and confirmed automatic recovery, scaling, and traffic rerouting.

INDUSTRY PROJECT TRAINING

Cloud Computing Project — TCS iON (Tata Consultancy Services) *Jun 2026 – Aug 2026*

- Completed a 135-hour project on a cloud-based big data processing system covering data ingestion, processing, and management.
- Worked with distributed pipeline workflows on scalable, distributed data processing.
- Performed configuration analysis and troubleshooting, and wrote technical documentation.

CERTIFICATIONS & TRAINING

- Ultimate AWS Certified Solutions Architect Associate 2026 — Udemy (Course completed, Oct 2026)
- AWS Cloud Practitioner Essentials — AWS Training & Certification (Training completed, Jun 2026)
- AWS Solutions Architecture Job Simulation — Forage, with Amazon Web Services (Feb 2025)

EDUCATION

Bachelor of Computer Applications (BCA) — Cloud Computing & Security *2024 – 2027 (Expected)*
Amity University | CGPA: 7.70
Industry Collaboration: **TCS iON (Tata Consultancy Services)** — Cloud Computing Project, 135 hours
