PROFESSIONAL SUMMARY

Immediate joiner and final-year BCA (Cloud Computing & Security) student seeking entry-level Business Operations, MIS/Reporting, Procurement, Logistics, Sales Operations and Real Estate Operations roles. Completed a 135-hour TCS iON data-processing project and built two documented, tested systems that combine process thinking, troubleshooting and automation. Organised, detail-oriented and comfortable with documentation, data handling and coordination, with Linux, Python and SQL as a technical advantage.

SKILLS

Operations & MIS: Operations Coordination, Data Entry & Validation, MIS Reporting, KPI Tracking, SOP & Process Documentation, Workflow Management, Records Management, Stakeholder Coordination

Supply Chain & Sales Ops (foundational): Procurement Basics, Vendor Coordination, RFQ, Purchase Order (PO), GRN, Inventory Tracking, Dispatch & Logistics Coordination, B2B Order Processing, Lead Management, Quotation Support, Property Listing & Site-Visit Coordination

Tools (foundational / learning): Microsoft Excel (PivotTables, VLOOKUP/XLOOKUP), Google Sheets, Power BI, CRM concepts (Zoho / HubSpot / Salesforce), ERP concepts (SAP MM/SD basics)

IT Advantage: Linux, Bash, Python, Boto3 (automation), SQL, AWS (EC2, S3, RDS, CloudWatch, SNS, IAM), Terraform, Docker, Git, Networking (TCP/IP, DNS)

Professional: Root Cause Analysis, Technical Documentation, Problem Solving, Communication, Time Management, Cross-Team Coordination

PROJECTS

Secure Multi-AZ AWS Infrastructure & Application Deployment | *Terraform* | *Docker* | *AWS*

- Designed and deployed a 3-tier environment using 10 AWS services as code, with defined access controls, encryption and audit logging (IAM, KMS, CloudTrail) for secure, auditable operations.
- Resolved 15+ deployment, access and configuration issues and documented root causes, building a reusable troubleshooting record.
- Live demo: nitesh.shop | GitHub: github.com/NiteshVishwakarma219/Secure-Multi-AZ-AWS-Infrastructure-Application-Deployment

AWS Reliability & Auto-Recovery (Monitoring & Operations) | *Terraform* | *CloudWatch* | *SNS*

- Built a highly available setup with health checks, automatic replacement of failed servers and CloudWatch/SNS alerts on CPU and health thresholds.
- Tested 3 failure scenarios and confirmed automatic recovery with no manual intervention, reducing downtime risk.
- GitHub: github.com/NiteshVishwakarma219/AWS-Production-Reliability-Auto-Recovery-System

EXPERIENCE & TRAINING

Cloud Computing Project Intern, TCS iON (Tata Consultancy Services) **Jun 2026 – Aug 2026**

- Completed a 135-hour project on a cloud-based big data processing system covering data ingestion, processing and management.
- Analysed configurations, troubleshot issues and wrote technical documentation for the project workflow.

Cloud Intern, CodeAlpha **Jul 2026 – Aug 2026**

- Worked in sandboxed AWS deployments using the Linux CLI, user permissions and basic Docker containers; followed documented steps and reported results.

CERTIFICATIONS & TRAINING

- Ultimate AWS Certified Solutions Architect Associate 2026, Udemy (course completed, Oct 2026; not an official AWS certification)
- AWS Cloud Practitioner Essentials, AWS Training & Certification (training completed, Jun 2026)
- AWS Solutions Architecture Job Simulation, Forage with Amazon Web Services (Feb 2025)

EDUCATION

Bachelor of Computer Applications (BCA), Cloud Computing & Security **2024 – 2027 (Expected)**

Amity University | CGPA: 7.70
