PROFESSIONAL SUMMARY

Immediate joiner and final-year BCA (Cloud Computing & Security) student seeking entry-level Technical Support, Application Support, Service Desk, Customer Support and Cloud Support roles. Hands-on with Linux, networking, monitoring and troubleshooting, with 15+ real issues diagnosed and documented across two AWS projects. Clear written communicator who can explain technical problems simply and follow incident, escalation and SLA processes.

SKILLS

Support & Incident Handling: Technical Troubleshooting, Root Cause Analysis, Incident Response, Escalation, Knowledge Base & Technical Documentation, Ticket Handling Concepts, SLA Awareness, Customer Communication (email / chat / call)

Systems & Networking: Linux, Bash, SSH, TCP/IP, DNS, CIDR, Subnetting, Routing, NAT, Load Balancing, Active Directory, Monitoring, Alerting, Health Checks

Cloud & Automation: AWS (EC2, VPC, S3, RDS, IAM, CloudWatch, CloudTrail, SSM, SNS, Lambda), Terraform, Docker, Git, Python, Boto3, PowerShell, SQL

Tools (foundational / learning): Ticketing tools (Jira Service Management / Freshdesk / ServiceNow concepts), CRM concepts (Zoho / HubSpot), Microsoft Excel, Google Sheets

Professional: Problem Solving, Active Listening, Patience, Written Communication, Time Management, Team Collaboration

PROJECTS

AWS Reliability & Auto-Recovery System | *Terraform* | *CloudWatch* | *SNS*

- Configured health checks, Auto Scaling and CloudWatch alarms with SNS notifications for CPU and health thresholds, similar to real incident alerting.
- Tested 3 failure scenarios (server termination, high CPU, unhealthy target) and confirmed automatic recovery and traffic rerouting.
- GitHub: github.com/NiteshVishwakarma219/AWS-Production-Reliability-Auto-Recovery-System

Secure Multi-AZ AWS Infrastructure & Application Deployment | *Terraform* | *Docker* | *AWS*

- Deployed a 3-tier Dockerized application with a private RDS PostgreSQL database, IAM least privilege, SSM Session Manager (no open SSH), KMS encryption and CloudTrail auditing.
- Resolved 15+ networking, IAM, KMS, container and deployment issues and documented each root cause and fix.
- Live demo: nitesh.shop | GitHub: github.com/NiteshVishwakarma219/Secure-Multi-AZ-AWS-Infrastructure-Application-Deployment

EXPERIENCE & TRAINING

Cloud Computing Project Intern, TCS iON (Tata Consultancy Services) **Jun 2026 – Aug 2026**

- Completed a 135-hour cloud big data processing project covering data ingestion, processing and management.
- Performed configuration analysis and troubleshooting, and wrote technical documentation.

Cloud Intern, CodeAlpha **Jul 2026 – Aug 2026**

- Worked in sandboxed AWS deployments using the Linux CLI, user permissions and basic Docker containers.

CERTIFICATIONS & TRAINING

- Ultimate AWS Certified Solutions Architect Associate 2026, Udemy (course completed, Oct 2026; not an official AWS certification)
- AWS Cloud Practitioner Essentials, AWS Training & Certification (training completed, Jun 2026)
- AWS Solutions Architecture Job Simulation, Forage with Amazon Web Services (Feb 2025)

EDUCATION

Bachelor of Computer Applications (BCA), Cloud Computing & Security **2024 – 2027 (Expected)**

Amity University | CGPA: 7.70
