

NITESH VISHWAKARMA

Cloud & Security Engineer

Bengaluru, Karnataka, India | niteshv8112@gmail.com | +91-8574591701 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Cloud & Security Engineer with hands-on experience building secure AWS infrastructure using Terraform, Linux, Docker, networking, IAM, and cloud security controls. Experienced in deploying production-style applications, implementing infrastructure as code, troubleshooting Linux and cloud environments, and applying security best practices across AWS workloads. BCA student specializing in Cloud Computing & Security, seeking entry-level Cloud, Cloud Security, Cybersecurity, System Engineering, or IT Infrastructure roles.

EXPERIENCE

Cloud Computing Intern — TCS iON (Tata Consultancy Services)

Industry Project: Cloud-Based Big Data Processing System | Jun 2026 – Aug 2026 | Remote

- Completed a 135-hour industry project — "Cloud-Based Big Data Processing System" — under TCS iON's Industry Projects program (Tata Consultancy Services), designing and contributing to a cloud-based pipeline for ingesting, processing, and managing large-scale datasets.

TECHNICAL SKILLS

Cloud: AWS (EC2, VPC, IAM, S3, RDS, ALB, Auto Scaling, Route 53, ACM, CloudWatch, SSM)

Cloud Security: IAM, Least Privilege, Security Groups, Network ACLs, VPC Security, CloudTrail, Secure Networking

Infrastructure: Terraform, VPC, Subnetting, Route Tables, NAT Gateway, Multi-AZ Architecture

Linux & Systems: Linux, Bash, SSH, Systemd, Nginx, Users & Groups, Permissions, ACLs, Package Management, Logs

Containers & DevOps: Docker, Docker Compose, Git, GitHub, GitHub Actions, Jenkins, Kubernetes

Security Tools: Nmap, Wireshark, Burp Suite, Metasploit, Kali Linux

Programming & Database: Python, Boto3, SQL, Java, PostgreSQL

PROJECTS

Enterprise AWS Cloud Infrastructure with Terraform

AWS, Terraform, Docker, IAM, Networking, High Availability | [GitHub: enterprise-aws-terraform-infrastructure](#)

- Built and deployed a full-stack, containerized HR/employee management application (React, Tailwind, FastAPI, PostgreSQL, JWT auth, RBAC) on a production-ready AWS environment provisioned entirely with Terraform (modules, remote state, state locking, workspaces).
- Designed a secure multi-tier VPC with public/private subnets, Internet Gateway, NAT Gateway, route tables, security groups, and network ACLs across multiple Availability Zones.
- Deployed on EC2 via Launch Templates and Auto Scaling Groups behind an ALB with ACM/TLS and Route 53 DNS, integrating RDS PostgreSQL in private subnets for high availability; enforced least-privilege IAM and centralized monitoring with CloudWatch, SNS, and SSM.

Enterprise AWS Cloud Security Platform

AWS | Terraform | IAM | CloudTrail | Security Groups | Python | [GitHub: enterprise-aws-cloud-security-platform](#)

- Built a cloud security platform focused on **AWS security monitoring, IAM controls, network security, and automated security checks**.
- Implemented security-focused AWS infrastructure and automation using Terraform and Python/Boto3.
- Documented security controls, findings, remediation procedures, and cloud security best practices.

Enterprise Linux Administration & Security

Linux | Bash | Python | Ansible | SSH | Nginx | Security | [GitHub: enterprise-linux-administration-security](#)

- Built a Linux administration and security environment covering **user/group management, permissions, ACLs, SSH hardening, systemd, Nginx, package management, logging, and troubleshooting**.
- Automated administrative and operational tasks using Bash, Python, and Ansible.
- Created troubleshooting procedures for common system and service failures.

EDUCATION

Bachelor of Computer Applications (BCA) — Specialization: Cloud Computing & Security

2024 – 2027

Amity University Online | CGPA : 7.70
